

VARIANT 1

Full name:	Group:

Task:	1	2	3	4	5	6	7	Total
Score:								

- (4 points) Find the distance from the point $(1, 1, -1)$ to the line of intersection of the planes $x + y + z = 1$ and $2x - y - 5z = 1$.
- (4 points) Two vertices of a triangle are $(4, -3)$ and $(-2, 5)$. If the orthocenter (intersection of altitudes) of the triangle is at $(1, 2)$, find the coordinates of the third vertex.
- (5 points)
 - Solve the system $\mathbf{A}\mathbf{w} = \mathbf{b}$, where $\mathbf{w} = (x, y, z)$. $\mathbf{A} = \begin{bmatrix} 1 & -3 & 1 \\ -1 & 2 & -5 \\ 5 & -13 & 13 \end{bmatrix}$, $\mathbf{b} = \begin{bmatrix} 4 \\ 3 \\ 8 \end{bmatrix}$
 - Draw relative positions of the planes that correspond to equations.
- (5 points) Find the distance between the parallel planes $2x - y + 2z + 2 = 0$, $6x - 3y + 6z - 4 = 0$.
- (5 points) Diagonals of a rhombus intersect at point $M(1; 2)$, the longest of them being parallel to a horizontal axis. The side of the rhombus equals 2 and its obtuse angle is 120° . Compose the equations of the sides of this rhombus in canonical form.
- (6 points) Find the transition matrix from basis $(\mathbf{x}_1, \mathbf{y}_1)$ to the basis $(\mathbf{x}_2, \mathbf{y}_2)$.

- (6 points) Apex S of a regular quadrilateral pyramid (four edges form a base, all base edges are equal) $SABCD$ has coordinates $(0, 0, 0)$ in some Cartesian coordinate system. It's also known that vertices A and C have coordinates $(-3, 2, -6)$ and $(1, 4, 2)$ respectively.
 - Find coordinates of vertices B and C .
 - Find the volume of the pyramid.
 - Find the distance from vertex A to the plane CDS .
 - Find the distance between lines AB and DS .

VARIANT 2
